ALLOWANCE

1. **Claims 1-9 are allowed.**
2. The following is an examiner's statement of reasons for allowance: prior art or record does not teach nor render obvious the overall claimed combination of **a foot and ankle control device with a foot support strap having a medial "D" ring attached to the support strap and a lateral "D"-ring attached to the support strain in spaced apart relation with the medial "D"-ring; the foot support strap positioned underneath the wearer's foot adjacent the in-step of the foot and a connecting strap positioned to lie over the arch of the foot and working in cooperation with the foot support strap to secure the lateral D-ring on the lateral side of the ankle and the medial D-ring on the medial side of the ankle; and an elastic lateral and medial control straps connecting respectively to the lateral and medial D-rings.** Therefore, the invention defined in claims 1-9 is considered novel.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No. 0892152 is cited to show a foot support strap (fig.1, 10) with medial and lateral elastic control strap (fig.1, 16), however reference '152 fails to show "the foot support strap positioned underneath the wear's foot adjacent the in-step of the foot and a connecting strap positioned to lie over teach of the foot"; and US Patent No. 6976972 is cited to show a connecting strap (fig.1, 39) positioned to lie over the arch of the foot and being secured to lateral and medial D-ring, however the combination structural limitation defining the novelty of the invention is not obvious over US'152 and '972.
